

Calibration Instruments

- **On-Board Preventative**
- **Meets SOLAS ISM regulation**
- **All in one test case**

Marine Calibrators and Test Case

In January 1998, the International Safety Management (ISM) code was adopted by IMO and became mandatory for certain ocean going vessels.

Not later than July 1st 2002 the SOLAS, Chapter IX, and the ISM code applies to all ships, including mobile offshore drilling units.

With our test case the vessel will have the necessary calibrated test equipment according to SOLAS (Safety Of Life At Sea).

We are also able to offer a periodically calibration system which helps the vessel to keep certified test equipment at any time.

”All-in-one”

- complete **Test Case** for most purposes -

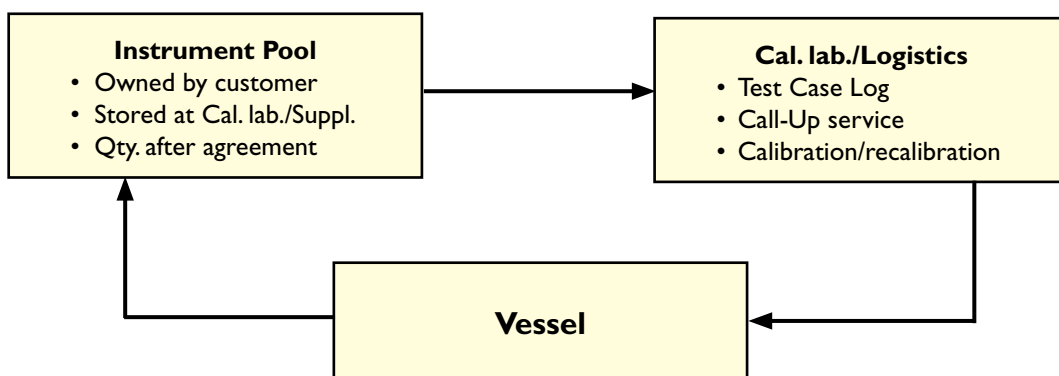

- **Main and Auxiliary Engines**
- **Propulsion**
- **Main and Auxiliary boilers**
- **Hydraulic Plant**
- **Sea water cooling**
- **Refrigeration Plant**
- **Fresh Water systems**
- **Heads and bathrooms**
- **Ballast and Bilge pumps**
- **Cargo Holds**

On-board you need all the help that you can get

We now offer a complete family of tools for maintenance of your control instrumentation. A vessel is often like a process plant, you never know what's going to go wrong. Or worse yet, where. When you're not sure what the problem is, our range of test equipment are the best help you can get in troubleshooting and calibration.

Easy system – helps you to meet **SOLAS** requirements

Flexible System

Our standard Test Case meets most sorts of applications on board Mercantile Vessels as well as Naval Vessels and mobile Offshore Drilling Units. However, our flexible system makes it easy to adjust to the specific needs you might have on certain vessels. The Test Case come complete with necessary accessories.

Products available in our standard Test Case

Certificates

All calibrators and test-instruments are supplied with traceable certificates.

Multifunction Calibrator

The new Fluke 725 Multifunction Calibrator is a versatile, easy-to-use field calibrator. Use the measure and source functions to test and calibrate all electrical signals on board.

Safety Multimeter

This new instrument sets the standard with a combination of precision, features, ease-of-use, safety and reliability.

Temperature Calibrator

Environmental and regulatory requirements are important parts of QA-systems that has to be implemented on-board. Our portable temperature calibrators cover temperatures up to 600°C.

Pressure Calibrator, digital

Compact, rugged and easy to operate pressure calibrators, make it easier for test and maintenance personnel to comply with all necessary requirements. Ranges from vacuum to high pressure.

Test Instruments

A wide range of test instruments can be supplied: IR thermometer, insulation tester, tachometer and AC current clamp are among the most common used.

4 in 1 Hand Pump

This multi-function pressure generator is a remarkable new hand pump for generating vacuum, gas and hydraulic pressure from a few mbar up to 700 bar. It replaces four conventional hand pumps.

Rugged Case

The case has got wheels for easy handling. All Pelicase® products has life time warranty.

Technical information

Part number code: 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18

Marine kit basic																	
Case including foam	6																
Pressure pump, 60bar, PV411	A																
Pressure pump, 40bar, TP1	B																
Pressure pump PV411, incl. hydraulic reservoir PV411-115	C																
Pressure Calibrator Bit02, specify range and accuracy		B															
Pressure Calibrator PM305, specify range and accuracy		P															
Test hose kit 700 bar			1														
Adapterkit1				1													
Adapterkit2					2												
Adapterkit4A, TP1 til PM305						A											
Adapterkit4B, TP1 til Bit02						B											
Adapterkit4C, PV411 til PM305						C											
Adapterkit4D, PV411 til Bit02						D											
Test connector, SK002							1										
Temperature calibrator, TC60M								L									
Temperature calibrator, TC600M								M									
Supply voltage 110VAC									U								
Supply voltage 230VAC									E								
Additional instruments:																	
Digital multimeters																	
MasTech MY60									1								
Fluke177									2								
Electrical calibrators																	
Loop calibrator, Fluke 705										1							
Loop calibrator, Tek Know 100										2							
Process meter, Fluke 789										3							
Multifunction calibrator, Fluke 725										4							
Others																	
IR thermometer, ST80											R						
Insulation tester, HI3452-13												H					
Tachometer, TM4010													L				
AC current clamp, HI3282														H			
Temperatur probe AU006 (T/C)															T		
Temperatur probe AUREF (Pt100)																P	

"0" (zero) in one of the 18 character chart number code equals no item delivered

Scan-Sense AS is a Norwegian company specialising in design and manufacturing of high quality sensors/instrumentation and related software for measurement of temperature, pressure, load and force.

Scan-Sense AS supplies portable temperature calibrators from -40°C to 1200°C and a range of EEx/IS approved portable pressure calibrators from vacuum to 1200 Bar.
